

Experienced Civil Engineers Needed

Company: Mayomi Ajani Engineering Services

Location: Akure, Ondo State

Job type: Full-Time

Positions: Entry-level and Intermediate

About Company

Mayomi Ajani Engineering Services is a professional engineering consulting firm with a mandate to refine the design, manufacturing and installation of engineering products that are efficient and sustainable.

We are building an enthusiastic, vibrant team to create a portfolio of high-quality assets using methodologies that are safer, more accessible and environmentally sustainable.

We need to bring on talented civil engineers who are savvy and ready to build. To be effective in this role, you must have a genuine desire to consistently deliver stellar products to our customers.

Position: Entry-Level

Qualification:

- B.Sc / HND Degree in Civil Engineering.
- Proven Post-NYSC work experience (1-3 years).

Responsibilities

- Assist to create detailed drawings for shop construction of projects.
- Drafting of telecommunications construction drawings.
- Develop and produce new methods and/or alternative designs that best suit client needs.
- Respond in a courteous and prompt manner to all client questions, complaints and/or requests to ensure a high level of customer satisfaction and escalate where necessary.

Job Requirements:

- Good knowledge of AutoCAD 2D (Tekla and Solidworks skills not required).
- Ample knowledge or interest in the engineering aspect of Tower Designs.
- Experience in how to develop, run, build, and test deployment tools in production environments.
- Strong Interpersonal communication skills in English - oral and written.
- Self-motivated with good organizational and time management skills.
- Ability to work accurately under pressure and teamwork spirit.
- Computer proficiency in MS package.

Position: Intermediate Level

Qualification:

- B.Sc / HND Degree in Civil Engineering.
- Proven Post-NYSC work experience (3-5 years).

Responsibilities

- Build and launch new products that bring significant value and delight to our customers.
- Control project from start to finish to ensure high quality, innovative and functional design.
- Compile project specifications, produce detailed blueprints and make any necessary corrections
- Deliver excellent drafting of telecommunications construction drawings.
- Review engineering content with clients and establish performance objectives.
- Promote teamwork and quality service through daily communication and coordination with teammates.

Job Requirements:

- Excellent knowledge of design and visualizations software.
- Strong skill level of working on AutoCAD 2D (Tekla and Solidworks skills not required).
- Ample experience in the engineering aspect of Tower Designs.
- Excellent knowledge and proficiencies with reviewing construction drawings.

- Experience in how to develop, run, build, and test deployment tools in production environments.
- Efficiency in planning, conceptual skills, and legal Compliance
- Strong Interpersonal communication skills in English - oral and written.
- Self-motivated with good organizational and time management skills.
- Great leadership skills.
- Ability to work accurately under pressure and teamwork spirit.
- Computer proficiency in MS package.

Featured Benefits:

- Competitive Salary
- Paid annual leave
- Health insurance
- Energetic and supportive teammates

Application Deadline: 15-Oct-2021
